

LOHITH GOWDA HP

Premium F1-Themed Portfolio — Antigravity Implementation Plan

Purpose: Build a polished, recruiter-friendly personal portfolio with a premium dark/red motorsport identity. The supplied screenshots and the referenced portfolio are visual/interaction inspiration only; do not copy their personal data, text, branding, or assets.

1. Final Product Direction

- **Theme:** Premium F1 / motorsport — near-black background, deep racing red accents, restrained glow, sharp geometry, technical labels.
- **Typography:** Full F1/motorsport-inspired condensed typography across headings, navigation, buttons, stats, cards, and body content. Prioritize readability through sizing, spacing, and contrast.
- **Animation level:** Premium — smooth fades/slides, staggered reveals, timeline drawing, hover motion, magnetic cursor; no excessive glitch/parallax effects.
- **Loading:** Display every time the site is opened/refreshed. Lohith Gowda + animated 0–100% progress bar + INITIALIZING status, then transition into Home.
- **Navigation:** Sticky top navigation with LOHITH GOWDA at left; HOME, SKILLS, PROJECTS, EDUCATION, CONTACT at right; red active indicator; hamburger menu on mobile.
- **Deployment:** Vercel.

2. Required Section Order

LOADING / HERO → HOME → SKILLS → PROJECTS → EDUCATION → CONTACT → FOOTER

Do not add an About Me section. Do not add a school/10th education section. Keep the requested section order exactly.

3. Personal Content

Field	Value
Full name	Lohith Gowda HP
Display name	Lohith Gowda
Position	Software Developer AI/ML Enthusiast DevOps Enthusiast
Status	Open to Opportunities
Expected graduation	2027
CGPA	8.35 / 10
Projects	03
Focus	AWS / DevOps
Location	Bengaluru, Karnataka, India

4. Home Section Specification

- Hero copy: LOHITH GOWDA prominently; Software Developer | AI/ML Enthusiast | DevOps Enthusiast beneath it.
- Show green status indicator: OPEN TO OPPORTUNITIES.
- Show expected graduation year: 2027.
- Primary actions: DOWNLOAD RESUME, VIEW PROJECTS, GET IN TOUCH.
- Stats/highlights: CGPA 8.35/10, 03 Projects, 2027 Graduation, AWS / DevOps.
- Keep the home section visually spacious and premium rather than overloaded.

5. Skills Section

01 — Languages: Python, C, JavaScript, Java, SQL

02 — Frontend: React, HTML, CSS, Tailwind CSS

03 — Backend: Node.js, Express.js, Django, Flask, FastAPI

04 — Database: MySQL, MongoDB, MongoDB Atlas

05 — AI / ML: Scikit-learn, TensorFlow, Keras, OpenCV, PyTorch, LangChain, Hugging Face, FAISS, Generative AI, RAG

06 — DevOps / Cloud: Docker, AWS, Linux, Ansible, Kubernetes, Jenkins, Terraform

07 — Tools / Technologies: Git, GitHub, VS Code, Postman, Vercel, Netlify

Use separate panels/categories. Avoid duplicating Docker, Linux, and AWS inside the Tools panel if already represented in DevOps/Cloud.

6. Projects Section

01 — CampusBunk — Smart Attendance Tracker

Smart attendance tracking app that helps students monitor attendance, calculate required classes, and avoid attendance shortages.

Stack: React Native, Expo, TypeScript

GitHub: <https://github.com/LohithGowda12/CampusBunk-Smart-Attendance-Tracker-Bunk-Safeguard>

Demo: https://expo.dev/artifacts/eas/mJ2Y1vXyFGJeOEiwnIJDElFbfRC_KONRa-wlZVWmz1o.apk

02 — RAG Pipeline

Retrieval-Augmented Generation pipeline for intelligent document retrieval and LLM-powered question answering.

Stack: Python, FAISS, Sentence Transformers, LLM

GitHub: <https://github.com/LohithGowda12/rag-pipeline>

Demo: Coming later

03 — FoodFlow — AI Food Ordering App

Full-stack food ordering platform for browsing food items, managing a cart, and placing orders through a React interface backed by Node.js, Express, and MongoDB.

Stack: React.js, Node.js, Express.js, MongoDB, Redux Toolkit

GitHub: <https://github.com/LohithGowda12/FoodFlow-FullStack>

Demo: Coming later

Layout: horizontal recruiter-friendly cards. Use project numbers, description, stack badges, GitHub action, and optional Live/Demo action. Hide or disable the Demo action for projects without a link rather than using broken placeholders.

7. Education Section

ROUND 02 | 2023–2027

Don Bosco Institute of Technology — B.E. — Computer Science & Engineering — CGPA: 8.35/10

ROUND 01 | 2021–2023

KLE Independent PU College — Pre-University — PCMB — 83%

Use a vertical F1-style timeline with a red line, year markers, progressive scroll drawing, and mobile-safe layout.

8. Contact Section

Channel	Displayed	Action
Email	lohithib04@gmail.com	mailto: link
GitHub	LohithGowda12	GitHub profile
LinkedIn	lohithgowda2005	LinkedIn profile
WhatsApp	76193****	WhatsApp deep link using actual number

Use a 2x2 interactive contact-card grid on desktop and a single column on mobile. Add DOWNLOAD RESUME below the grid. Footer should contain Lohith Gowda HP and Bengaluru, Karnataka, India.

9. Resume Handling

Use the uploaded resume as the source PDF asset. In the Antigravity project, place a copy at public/resume/Lohith-Gowda-HP-Resume.pdf and configure both Home and Contact download buttons to point to it. The current uploaded resume contains older values (8.4 CGPA and 84% PUC); the website must use the user's latest supplied values, 8.35 CGPA and 83% PUC. Do not silently modify the uploaded PDF.

10. Cursor & Motion

- Custom red cursor with a smooth trailing ring.
- Cursor grows on buttons, links, project cards, and navigation.
- Subtle magnetic attraction around primary buttons.
- Disable custom cursor effects on touch devices.
- Use Framer Motion for reveal, hover, and section transitions.
- Respect prefers-reduced-motion.

11. Recommended React Architecture

```
src/
├── components/
│   ├── LoadingScreen.jsx
│   ├── NavBar.jsx
│   ├── Home.jsx
│   ├── Skills.jsx
│   ├── Projects.jsx
│   ├── Education.jsx
│   ├── Contact.jsx
│   ├── Footer.jsx
│   └── CustomCursor.jsx
├── data/portfolio.js
├── App.jsx
├── main.jsx
└── index.css
```

Keep all personal content in one data file where practical. This makes future updates to skills, projects, links, and education easy without rewriting UI components.

12. Theme Tokens

- Background: near-black / charcoal, e.g. #070707–#111111.
- Primary accent: deep racing red; use a restrained palette rather than bright neon red everywhere.
- Text: high-contrast off-white with muted gray secondary text.
- Borders: dark gray with subtle red emphasis on active/hover states.
- Cards: slightly lighter charcoal than the page background.
- Effects: soft red glow only on selected interactions.

13. Accessibility, Quality & Performance

- Semantic HTML and keyboard-accessible interactive controls.
- Visible focus states.
- Good contrast despite the dark theme.
- External links should use safe target/rel behavior where appropriate.
- No broken Demo links; conditionally render unavailable actions.
- Optimize font loading and avoid unnecessary heavy assets.
- Lazy-load noncritical visual assets.
- Test desktop, tablet, and mobile widths.
- Run npm run build before deployment.
- Verify all navigation anchors, external links, resume downloads, and WhatsApp behavior.

14. Antigravity Build Sequence

1. Initialize React + Vite project.
2. Install Tailwind CSS, Framer Motion, and Lucide React.
3. Create theme tokens and global typography.
4. Build LoadingScreen and 0–100% transition.
5. Build sticky Navbar and section anchors.
6. Build Home and statistics/actions.
7. Build Skills category panels.
8. Build horizontal Projects cards.
9. Build Education timeline.
10. Build Contact grid and resume download.
11. Build Footer.
12. Implement custom cursor and responsive behavior.
13. Add scroll/hover animations and reduced-motion fallback.
14. Test links, resume, mobile layout, keyboard navigation, and build.
15. Deploy production build to Vercel.

15. Reference Note

The supplied reference portfolio demonstrates the desired information hierarchy and interaction ideas: initialization screen, sticky navigation, project/skill/education/contact sections, resume action, status indicator, stats, and motorsport-inspired labels. Use it as inspiration only. Do not copy its person's data, wording, branding, source code, or visual assets.

Reference: akshobyaas.github.io

16. Final Acceptance Checklist

- Loading screen appears on every page load and reaches 100% before Home.
- Section order is exactly Home → Skills → Projects → Education → Contact after loading.
- Lohith Gowda appears top-left in navigation.
- Green Open to Opportunities status is visible.

- Home contains title, graduation year, CGPA, project count, AWS/DevOps focus, resume, projects, and contact actions.
- All seven skill categories are present.
- Exactly three projects are displayed.
- Education contains only Engineering and PUC.
- Contact contains Email, GitHub, LinkedIn, WhatsApp with masked displayed number.
- Both Home and Contact have resume download buttons.
- Footer contains name and Bengaluru, Karnataka, India.
- Cursor animation works on desktop and is disabled on touch.
- Responsive layout works without horizontal overflow.
- All supplied external links work.
- Production build succeeds and deploys to Vercel.
